# DANE WILLIAMS

dwilli36@nd.edu | danewilliams.me | 425 988 4749 linkedin.com/in/danerwilliams | github.com/danerwilliams

### **Education**

#### **University of Notre Dame**

Notre Dame, IN

B.S. Computer Science, College of Engineering

Aug. 2018 - May 2022

- Cumulative GPA: 3.74/4.0. Maior GPA: 3.86/4.0. Dean's List (Spring 2020, Fall 2020)
- o Relevant Coursework: Data Structures, Algorithms, Databases, Compilers, Systems, Discrete Math, Logic Design, Computer Architecture
- o Notre Dame Water Polo: Captain, Great Lakes Conference champion

## **Experience**

Qualtrics Seattle, WA

Software Engineer Intern

May 2021 - August 2021

Software Engineer Intern on the PX team

# Notre Dame Visualization Lab Data Visualization Researcher

Notre Dame, IN

Aug 2020 - Present

- Researcher under Dr. Chaoli Wang working with D3.is javascript data visualization libraries
  - Designing and building visual analytical tools of Notre Dame student learning data with the goal of helping close academic performance gaps which result from disparities in student backgrounds

AT&T San Ramon, CA

Technology Development Program Intern

Jun 2020 - Aug 2020

- o Contributed to AT&T Labs research in detecting 5G network anomalies:
  - o Developed a Python application for centralizing virtual network function data with an Apache Pulsar message bus (similar to Kafka)
  - Processed data with Python and Apache Flink data stream computation engine (similar to Hadoop and Spark)
- Scrum master and full stack developer among a team of interns which built a MERN stack (Mongo, Express, React, Node) application for improving student engagement in online classroom environments

Symetra Bellevue, WA

Cloud Intern

May 2019 - Aug 2019

Technologies: Linux/Unix, AWS, Git

- Gathered and visualized over 20,000 network infrastructure related data points by writing various Python scripts which drove strategy leading to over \$50k in monthly circuit savings
- Automated invoice processing with Python, Boto3 SDK, AWS Machine Learning: Textract (Optical Character Recognition) and Comprehend (Natural Language Processing), as well as other AWS services: SQS, SNS, and S3

### **Projects**

- Tmux Dracula Theme: Open source maintainer and contributor for the official Dracula Theme, github.com/dracula/tmux
  - o Wrote the original codebase for a tmux (terminal multiplexor) plugin which was accepted to the official Dracula Theme.
  - Use API's and Unix pipelines with shell scripts to gather various pieces of system information and display in the tmux status bar.
  - o Commit code, merge pull requests, perform code reviews, and manage issues (bugs, feature requests, todos) for the project.
  - o Project has over 100 github stars, averages hundreds of clones per week, and has attracted several contributors from around the world.
- Playruski.com: Social web app for Ruski, a popular game at the University of Notre Dame github.com/coderQuad/ruski
  - o Built a full stack web app supporting hundreds of users using the MEAN stack as part of a team of four Notre Dame CS students
  - $\circ~$  Developed a spec compliant GraphQL API with node.js, express, and MongoDB
  - Deployed frontend to playruski.com with Netlify and backend API to an AWS EC2 virtual machine secured over HTTPS with Let's Encrypt
  - o Configured AWS S3 Buckets and Cloudfront CDN for storing user profile picture uploads and serving static content
  - o Contributed various features of the frontend written in typescript using the Angular framework
- Pastebin and URL Shortener: Site for shortening URL's or uploading small files built in serverless AWS, github.com/danerwilliams/pstb.in
  - Used the Chalice framework for Python to implement AWS Lambda, S3, and API Gateway microservices as a backend.
  - o Developed a simple frontend client in HTML, CSS, and JavaScript which is deployed to pstb.in using AWS CloudFront.
  - o Implemented a continuous integration pipeline with Github actions to automatically deploy client to AWS when changes are merged.
- GroupMe Chat Bot: An AI chat bot written in Python, github.com/danerwilliams/pork-chop
  - o Developed a GroupMe chat bot in Python that participates in conversation as well as responds to custom command modules.
  - o Runs on a Flask server and can be trained for conversation from a custom csv dataset or other corpus files using the ChatterBot module.
- B-Minor Compiler: A 4 stage compiler for the B-Minor programming language consisting of a scanner, parser, formatter, and typechecker
  - o Scans B-Minor source code for legal tokens using regular expressions written in Flex (Lex).
  - Parses tokens for proper syntax using a context free grammar written in Bison (Yacc).
  - o Builds an abstract syntax tree in C from the parsed tokens, and then prints the source code using a consistent and readable format.
  - Resolves variables and then checks for legal type assignments in the abstract syntax tree to ensure assembly code can be generated.

# Skills

Languages: Python, C, Shell, C++, JavaScript, Java, Verilog, HTML/CSS, ARM Assembly
